

Calibration Certificate: Additional fee for each extra temperature probe

Termékkód: SLU009

Temperature calibration certificate issued by an accredited calibration laboratory.

The surcharge applies to the accredited calibration of each additional temperature probe connected to the device. Calibration is typically performed at three temperature points, which can be optionally specified according to customer requirements.

The calibration is carried out by an accredited calibration laboratory in accordance with ČSN EN ISO/IEC 17025:2018 and is documented by a calibration certificate internationally recognized under the EA MLA and ILAC MRA agreements.
